Schedule of Rates – Appendix “A”

1.0 Summary

By this Order, the Public Utilities Board (Board) approves, on an interim ex parte basis, Centra Gas Manitoba Inc.'s (Centra) application to decrease the current Primary Gas rate to \$0.0819/m³ effective May 1, 2016. The current rate is \$0.0942/m³ for Primary Gas consumed on or after February 1, 2016. For a typical residential customer, the effect of the Primary Gas rate change is an annual bill decrease of 3.3% (or \$25 per year).

Primary Gas is a pass-through cost for Centra, meaning that Centra charges customers what it pays for Primary Gas and does not make a profit on its sale. The costs of Primary Gas are predominantly determined by the market price of natural gas in Western Canada.

Primary Gas rates are reviewed quarterly. The next quarterly rate adjustment will be for Primary Gas consumed on or after August 1, 2016.

2.0 Introduction

Centra is a wholly-owned subsidiary of Manitoba Hydro. Centra's quarterly rates are subject to the approval of the Board pursuant to provisions of *The Public Utilities Board Act*.

The five components of natural gas rates billed to Centra's customers are:

- Primary Gas – gas that is sourced by Centra under its Western Canadian gas supply contract, which is priced quarterly by Centra, or gas purchased by consumers from either Centra or independent gas marketers and brokers under contracts, usually for a fixed rate and a fixed term;
- Supplemental Gas - gas that is required to meet the needs of Centra's customers during periods of peak load or other seasonal requirements. Supplemental Gas is applicable to the majority of customers, whether they purchase quarterly-priced Primary Gas from Centra or fixed-rate gas through contracts;
- Transportation (to Centra) - is the cost of transporting natural gas to Manitoba, including charges for pipelines not owned by Centra and the cost of gas storage facilities and is applicable to the majority of Centra's customers;
- Distribution (to Customer) – is the cost of delivering natural gas to a customer's home or business, including the cost of facilities and pipelines owned by Centra, as well as the operation and maintenance costs for the distribution system and a small cost component related to unaccounted-for gas;
- Basic Monthly Charge - is the costs related to customer service including meter reading and billing, as well as the cost of the service line and the meter.

Centra's Primary Gas rate is subject to quarterly amendment (February 1, May 1, August 1, and November 1). These regularly scheduled quarterly Primary Gas rate reviews occur in accordance with the Board-approved Rate Setting Methodology (Rate Setting Methodology), which is formula-driven and relies on established accounting and rate setting conventions. Quarterly Primary Gas rate setting does not involve a public hearing, reflecting the formulaic nature of the Rate Setting Methodology and furthering the objective of least-cost regulation. Public reviews of Primary Gas rates are conducted at periodic Cost of Gas or General Rate Application hearings.

Non-Primary Gas components of Centra's rates, for all customers including those receiving natural gas through fixed-rate contracts, are also periodically reviewed and approved by the Board. These non-Primary Gas rate reviews occur either through periodic Cost of Gas hearings, which also provides for the finalization of past interim quarterly Primary Gas rate changes, or in the context of a General Rate Application.

Order 4/16, dated January 11, 2016, is the most recent Order setting Centra's Primary Gas rate. Order 108/15, dated October 29, 2015, approved new Supplemental Gas, Transportation, and Distribution base rates. Order 89/13, dated August 2, 2013 and arising out of Centra's 2013/14 General Rate Application, approved the current Basic Monthly Charges. Order 108/15 is the most recent Order to adjust non-Primary Gas rates.

3.0 Centra Gas Manitoba Inc.'s Application for Primary Gas Rate

On April 14, 2016 Centra applied to the Board for approval of the Primary Gas rate effective May 1, 2016. The Application was filed in accordance with the Board-approved Rate Setting Methodology. The Rate Setting Methodology determines a Primary Gas rate based on the forecast of natural gas prices and includes several factors that reflect the costs Centra incurs in providing Primary Gas to its customers.

Centra's Primary Gas rate is based on futures prices at AECO, a major gas trading hub in Alberta. Table 1 reflects the 12 month futures price strip¹ for natural gas taken by Centra on April 1, 2016 and used in the calculation of the proposed May 1, 2016 Primary Gas rate. The futures strip prices for October and December 2015 from previous quarterly rate applications are also shown in Table 1. As can be seen from the table, the April 2016 futures prices have decreased compared to the December futures prices.

Table 1: AECO Futures Price (Cdn\$/GJ)

\$/GJ)	May/16	Jun/16	Jul/16	Aug/16	Sep/16	Oct/16	Nov/16	Dec/16	Jan/17	Feb/17	Mar/17	Apr/17
Oct Strip	2.5079	2.528	2.5507	2.5808	2.5773	2.631	-	-	-	-	-	-
Dec Strip	2.1325	2.1307	2.1329	2.1466	2.1617	2.2124	2.3709	2.5517	2.6531			
Apr Strip	1.0397	1.1534	1.3065	1.4497	1.5602	1.7580	2.2108	2.4977	2.5663	2.5820	2.5298	2.3511

¹ A price strip is a gas price forecast for a specific period or "strip" of time based on the market prices of gas as traded on an exchange.

Table 2 summarizes Centra's Application for the quarterly Primary Gas rate effective May 1, 2016. The table shows Primary Gas costs and rate calculations for the last year. In calculating Primary Gas rates, Centra used the Board-approved Rate Setting Methodology.

Table 2: Current and Historical Primary Gas Rate Calculations

	Component	Costs and Proposed Rates May 1/15	Costs and Proposed Rates Aug 1/15	Costs and Proposed Rates Nov 1/15	Costs and Proposed Rates Feb 1/16	Costs and Proposed Rates May 1/16
1	Date of Forward Price Strip	April 2, 2015	July 6, 2015	October 1, 2015	December 14, 2015	April 1, 2016
2	Weighted Primary Gas Cost (mix of Gas Supply & Storage Gas costs)	\$3.178	\$3.141	\$2.764	\$2.522	\$2.421
3	Rate per Cubic Metre	\$0.1201	\$0.1187	\$0.1045	\$0.0953	\$0.0915
4	Base Primary Rate, adding Fuel and Overhead cost component per cubic metre	\$0.12237	\$0.1210	\$0.1069	\$0.0976	\$0.0937
5	Plus (Less) Rate Rider per cubic metre	(\$0.0041)	(\$0.003)	(\$0.0005)	(\$0.0034)	(\$0.0118)
6	Total Billed Rate (\$/m ³)	\$0.1183	\$0.1180	\$0.1064	\$0.0942	\$0.0819

Notes:

- Compressor fuel costs are \$0.0013/m³ and overhead costs are \$0.00087/m³.

AECO futures market prices, shown above in Table 1, are weighted according to the forecasted volumes Centra expects to purchase each month that flow directly to Manitoba consumers. This weighted price includes the costs to deliver the gas from the AECO hub to Centra's receipt point at Empress, Alberta. The 12 Month Forward Price is then weighted for the average cost of gas volumes that Centra withdraws from its storage facility, and is shown in row 2 of Table 2 as the Weighted Primary Gas Cost

(mix of Gas Supply & Storage Gas costs).² The Weighted Primary Gas Cost per gigajoule is then converted to units of dollars per cubic metre ($\$/\text{m}^3$) and is shown in row 3 of Table 2.

Centra incurs compressor fuel costs, which relate to fuel used by pipeline compressors in order to transport gas from Alberta to Manitoba. Centra also incurs overhead costs in the procurement and administration of Primary Gas supplies. The compressor fuel costs and overhead costs are added to the Weighted Primary Gas Cost to determine the Primary Gas Base Rate, which is shown in row 4 of Table 2.

Centra tracks differences between the previously approved Primary Gas rate (and its underlying gas costs) and the actual cost of purchases it incurs. The previously approved Primary Gas rate is based on a forecast of natural gas market prices, and the prices Centra actually pays usually differ from those forecasted. These differences are tracked in a Purchased Gas Variance Account (PGVA). When the actual cost of gas is greater than what was forecasted, a positive balance accrues in the PGVA, which is then collected from customers. When the actual cost of gas is less than what was forecasted, a negative balance accrues in the PGVA and this is refunded to customers. A Primary Gas rate rider is used to account for these differences between forecasted and actual costs of Primary Gas.

A Primary Gas rate rider recovers from or repays to customers the balance in the PGVA, with interest.³ Utilization of the PGVA and rate rider ensures that customers' costs are adjusted with the rate riders so that customers are paying for the actual cost of gas with no mark-up or discount. The Primary Gas rate rider is determined by dividing

² Due to significant seasonal and daily weather and resulting demand swings in Manitoba, Centra makes use of seasonal gas storage facilities in order to optimize its gas supply portfolio costs and reliability. This includes relying partially on storing gas in the summer months and retrieving it from storage during the winter months.

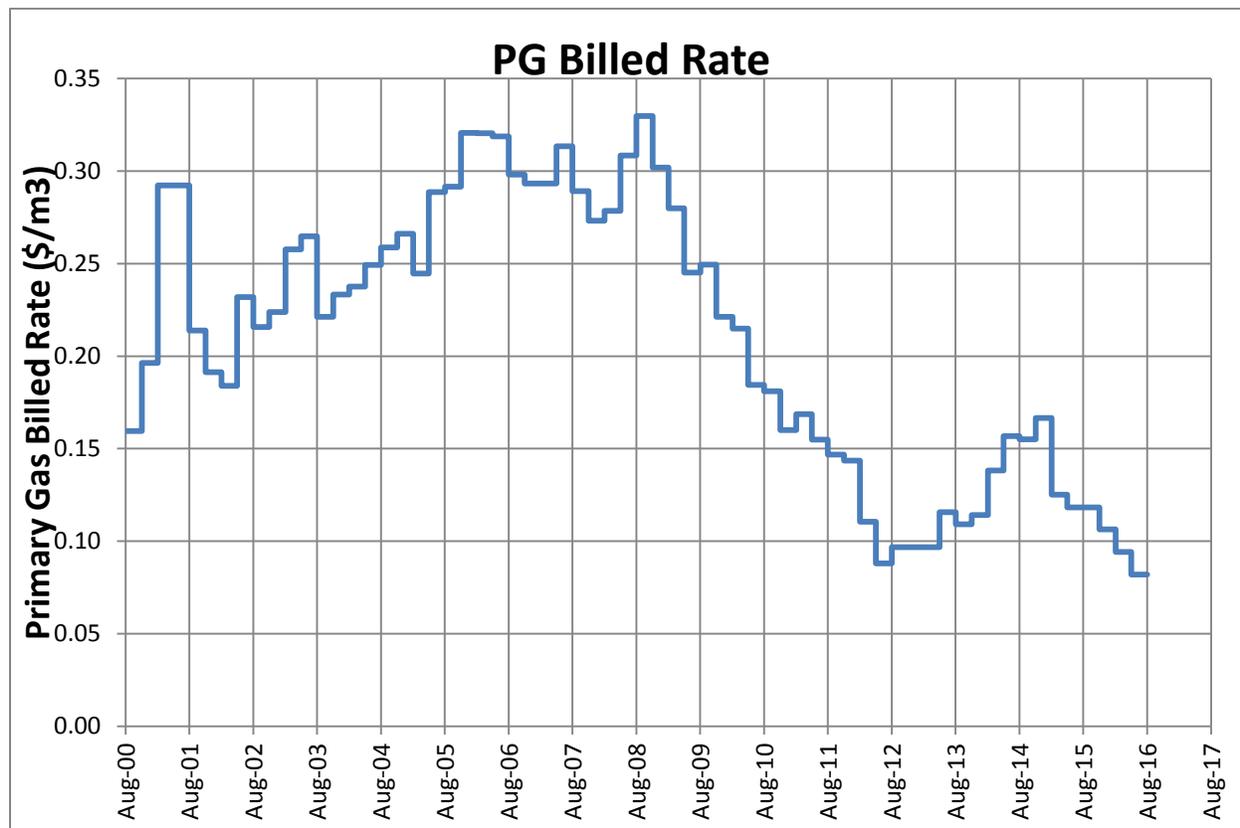

³ Interest is determined based on Centra's actual cost of borrowing, which reflects the carrying cost, to Centra, of the PGVA balance.

the accumulated balance in the PGVA by the volumes Centra forecasts to flow in the upcoming twelve months, and is shown in row 5 of Table 2. If the PGVA balance is not brought to zero with the rate rider, the remaining balance will be included in the calculation of future rate riders.

The Primary Gas rate rider is combined with the Primary Gas Base Rate to arrive at the Primary Gas Billed Rate, as shown in row 6 of Table 2, and this is the rate that Centra uses to calculate the bills of its Primary Gas customers.

The forecasted PGVA balance for April 30, 2016 is \$13.3 million owing to customers. This will be refunded to customers by way of a rate rider of \$0.0118/m³ resulting in a Primary Gas Billed Rate of \$0.0819/m³ as shown in row 6 of Table 2.

The following chart graphically shows the Primary Gas Billed Rate from August 1, 2000 up to and including the proposed May 1, 2016 rate.

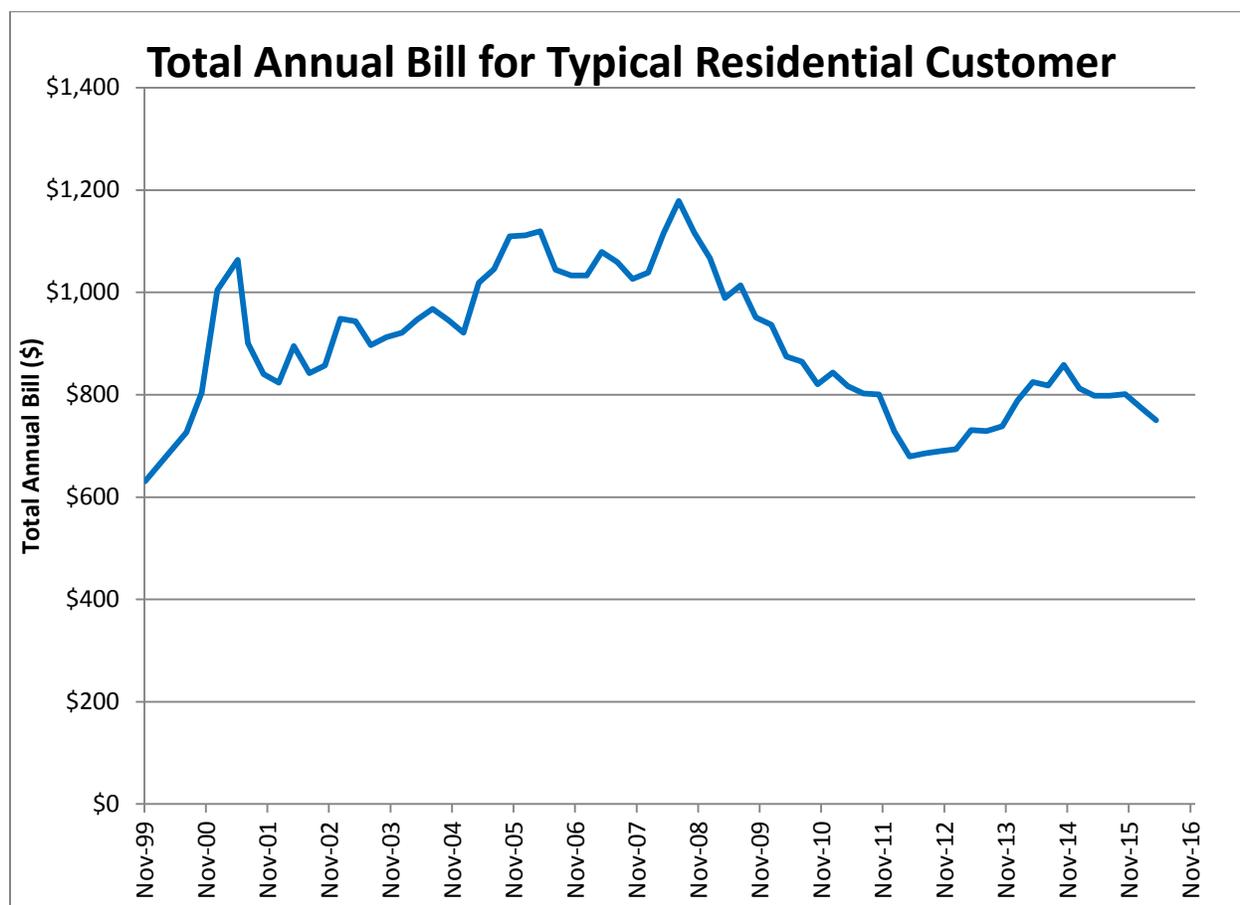

4.0 Customer Impact

The annualized bill impacts effective May 1, 2016 on the various customer classes resulting from the change in the Primary Gas rate are as follows:

Customer Class	Annualized Rate Decrease (Illustrative)
Small General Service	(2.6%) – (4.0%)
Large General Service	(3.8%) – (5.2%)
High Volume Firm	(4.9%) – (6.9%)
Mainline	(5.7%) – (7.0%)
Interruptible	(5.6%) – (7.3%)

The projected annualized bill impact for a typical residential customer, based on average annual consumption of 2,243 m³ of gas, is a decrease of \$25/year or 3.3% from February 1, 2016 rates.

A graph of the historical annual bill for typical residential customers as a result of all of Centra's rate changes is shown below:

5.0 Board Findings

Approval

As Centra's April 14, 2016 Application properly reflects the Board-approved Rate Setting Methodology, the Board approves Centra's Application to amend the Primary Gas rate. The Primary Gas rate will decrease to \$0.0819/m³ effective May 1, 2016.

Primary Gas rate changes affect only those customers receiving quarterly-priced Primary Gas from Centra. Customers on fixed-price contracts with either gas marketers or Centra are not affected. The next review of the Primary Gas rate will take place as of August 1, 2016.

Notification

Centra must advise its customers of the change in the Primary Gas rate.

Board decisions may be appealed in accordance with the provisions of Section 58 of *The Public Utilities Board Act*, or reviewed in accordance with Section 36 of the Board's Rules of Practice and Procedure (Rules). The Board's Rules may be viewed on the Board's website at www.pub.gov.mb.ca.

6.0 It Is Therefore Ordered That:

1. The Schedules of Rates attached to this Order as Appendix “A”, effective for all gas consumed on and after May 1, 2016, BE AND ARE HEREBY APPROVED on an interim basis.
2. This Interim Order shall be in effect until confirmed or otherwise dealt with by a further Order of the Board.
