DECISION AND ORDER ON COST AWARDS

EB-2017-0181

ENBRIDGE GAS DISTRIBUTION INC.

**Application for quarterly rate adjustment mechanism commencing
July 1, 2017**

By Delegation, before: Pascale Duguay

August 23, 2017

INTRODUCTION AND SUMMARY

Enbridge Gas Distribution Inc. (Enbridge) filed an application with the Ontario Energy Board (OEB) dated June 9, 2017 for an order approving or fixing rates for the sale, distribution, transmission, and storage of gas effective July 1, 2017 (application).

The Decision and Interim Order was issued on June 27, 2017 which, among other things, directed eligible parties to file their cost claims with the OEB and Enbridge no later than July 7, 2017. Enbridge had until July 21, 2017 to object to any aspect of the costs claimed. Any responses to Enbridge's concerns were to be filed with the OEB and Enbridge by July 28, 2017.

The Canadian Manufacturers & Exporters (CME), the Federation of Rental-Housing Providers of Ontario (FRPO) and the Industrial Gas Users Association (IGUA) filed cost claims with the OEB and copied Enbridge.

On July 18, 2017, Enbridge filed a letter stating that it had no objection to the cost claims.

OEB Findings

I have reviewed the cost claims filed and find the costs claims of CME and IGUA to be reasonable and find that these parties are entitled to 100% of their reasonably incurred costs of participating in this proceeding. With respect to the intervention of FRPO, I find the cost claim to be excessive having regards to the contribution of FRPO in the OEB gaining a better understanding of the issues in this proceeding. As previously stated in the decision and order and acknowledged by FRPO, the QRAM process was developed to provide an expedited and mechanistic rate-setting process. The issues raised by FRPO were primarily related to the analysis of alternative supply or transportation options which are not part of the QRAM process. These issues are being reviewed in the Consultation on the Framework for the Assessment of Distributor Gas Supply Plans, and are not within the scope of the QRAM process. Therefore, I find that FRPO's cost claim should be reduced by 50%.
