B. The director of the property control division of the general services department may allow waivers for and exercise the regulatory powers granted by Subsection A of this section over all leases and rental agreements entered into by any state agency, which

are subject to his control by virtue of Subsection E [Subsection A(5)] of Section 15-3-2 NMSA 1978.

The director of the property control division may let contracts for these purposes made according to the established state purchasing procedures for contracts of the type and amount let. However, all such remodeling, major renovation and construction must first be approved by the state board of finance. This subsection shall

not apply to any redesigning, major renovation or remodeling or the erection of additional buildings of the state highway department.

B. The director of the property control division, subject to the approval of the state board of finance and after following the bidding procedures required by the Procurement Code for the purchase of tangible personal property, has the authority to enter into long-term leases, for periods not to exceed ten years, of vacant lands, where the lessor contracts with the state to construct and complete buildings, subject to the approval of the staff architect, as a condition precedent to the start of the rental term. Such buildings shall comply with applicable standards for the physically handicapped and applicable codes. No lease shall be executed under this subsection until the staff architect created under the provisions of Section 15-3-13 NMSA 1978 shall have filed with the legislative finance committee a detailed statement of his evaluation and approval of the proposed building.

C. The secretary of general services shall establish a schedule of rental fees at rates consistent with rates charged for comparable space in the area for state agencies occupying space in state-owned buildings and require such fees to be included in the budgets of such agencies at such time as the money is available, but not later than the budget for the sixty-eighth fiscal year. Such amounts shall be transferred periodically by the department of finance and administration into the "long-term lease guarantee fund" hereby created, for the purpose of effectuating the purposes of this section. The fund shall be used to guarantee leases which have been approved as provided in Subsection B of this section, but not to pay lease payments or any part thereof unless the legislature fails to appropriate any funds to the agency for space, and the payment is required to prevent default or legal action. Each lease guaranteed by the fund shall be considered an encumbrance of the fund for a specified sum, in an amount equal to the balance of payments remaining on the lease, and no lease shall be entered into until such lease can be guaranteed by unencumbered balances in the fund to the extent of the payments remaining on the lease. No fees shall be established for or paid by state institutions of higher learning, hospitals and institutions for the mentally or physically handicapped, the supreme court, the land office, correctional institutions or the state highway and transportation department.
